

ADVANTAGES

- Various media types available to suit application
- Economy of a cleanable renewable filter
- May be oiled on-site to increase efficiency

Application	Cleanable, high velocity, low pressure drop air filters for the elimination of particulate (not water or mists)
Frame	Galvanised steel
Media	Gavanised steel
Relative Humidity max	100%
Comment	Airflow operating range: Velocity of 450 fpm to 550 fpm, consult factory outside of this range Ratings: Rated by Underwriters Laboratories as UL Class 900 For more details: Product Sheet 2001
